

Dräger FPS 7000 Head-Up-Display (HUD)

Series: Dräger FPS 7000

The Dräger FPS 7000 Head-Up Display (HUD) continuously shows cylinder pressure and fits inside the FPS 7000 full face mask. It integrates easily with the Dräger PSS 7000 breathing apparatus, so key data stays in view during use. The display fits the FPS 7000 mask without tools and can be moved to another mask within seconds in an emergency. Protected inside the mask, it cannot be damaged by heat, impact, moisture or chemicals. The battery provides an average of 360 hours of use and can be replaced without tools. The transmitter module sends data wirelessly to the mask, avoiding cables and connection errors. Red, yellow and green LEDs show cylinder pressure, and the display adjusts automatically to ambient light. In addition to the breathing apparatus low-pressure warning, a red LED on the HUD flashes when the pressure reaches the low-pressure threshold.

- 01 Cylinder pressure always in view
- 02 Fits the FPS 7000 mask without tools
- 03 Protected inside the mask
- 04 Battery lasts 360 hours on average
- 05 Wireless data transmission
- 06 Extra low-pressure warning by red LED

Technical data

BRAND	Dräger
MODEL	Dräger FPS 7000 Head-Up-Display (HUD)
WARNING DEVICE	Red LED flashes when the cylinder pressure reaches the low-pressure threshold (additional warning alongside the breathing apparatus)
MONITORING FEATURES	Pressure
COMPATIBLE WITH	Dräger FPS 7000
