Dräger PARAT 3200

Product code: 3704478 · Series: Dräger PARAT

The Dräger PARAT 3200 is a mouthpiece / nose clip escape device equipped with a multi-gas ABEK15 filter. Packed in a robust and ergonomic case, it is compact and easy to carry. It is approved to DIN 58647-7, the only recognised standard for filtering industrial escape devices, and gives the user a minimum of 15 minutes escape time, protecting against a wide range of toxic industrial gases. The device consists of a mouthpiece with nose clip and an integrated ABEK15 filter; it is easy and safe to don, even for bearded wearers, and provides very low leakage values. It comes with a belt clip as standard; a grip clip, slip guard carabiner, shoulder strap and hand strap are available as additional carrying options. Traction grip areas on the housing allow safe handling, and the robust case protects the device in extreme working conditions. The transparent backplate gives a clear view of the device; the expiry date printed on the filter and the donning pictograms are protected against abrasion under the backplate. The overall lifetime is 12 years, provided the filter is replaced every 4 years. It weighs 11.64 oz. Order number: 3704478.

- 01 Mouthpiece with nose clip and integrated ABEK15 filter
- 02 Minimum 15 minutes escape time, DIN 58647-7 approved
- 03 Suits bearded wearers, very low leakage
- 04 12-year lifetime with filter exchange every 4 years
- 05 Transparent backplate, protected expiry date
- 06 Belt clip plus additional carrying options
