Dräger PAS ASV

Product code: 33 54 140 · Series: Dräger PAS

The Dräger PAS ASV is an automatic switch-over valve that connects a compressed air breathing apparatus to an external air supply such as a factory ring main. If the external supply fails, it switches to the wearer's cylinder without interruption, keeps positive pressure in the mask and a warning device signals the change. Compact and light at 350 g, it is easy to use in confined spaces.

- 01 Automatic switch to cylinder air if the line fails
- 02 Positive pressure kept during switch-over
- 03 Warning device when breathing cylinder air
- 04 Compact: 130 x 54 x 32 mm, 350 g
- 05 Permanent or occasional fit versions
- 06 Approved to EN 14593-1 and EN 137

Technical data

BRAND	Dräger
MODEL	Dräger PAS ASV
POSITIVE PRESSURE	Yes
WARNING DEVICE	Warning device signals when the wearer is breathing cylinder air
WEIGHT	0.35 kg

Standards

STANDARD
