

Dräger Bump Test Station

Series: Bump Test Station

Dräger Bump Test Station is a cordless, portable station for function (bump) testing portable gas detectors on site. It needs no power supply; checks with a test gas cylinder take seconds. If a test fails, devices such as the X-am 1/2/5 series are adjusted automatically in the station.

- 01 No power supply needed, portable
- 02 Function test in seconds with a test gas cylinder
- 03 Low gas consumption thanks to fast sensor response
- 04 Automatic adjustment after a failed test (e.g. X-am 1/2/5 series)
- 05 Used with Pac 6000/6500/8000/8500 and X-am 2600/2800/5000/5600/5800
