

HPS 4500

Series: HPS

The Dräger HPS 4500 is a traditional half-shell fire and rescue helmet in a modern design. Its high-temperature-resistant Duroplast shell, reinforced with aramid fabric, protects against impacts and naked flames. The PPSU visor reaches down to the chin, is suitable for interior fire fighting and is approved to EN 14458. It comes in two shell sizes (48-61 and 56-64 cm) and is approved to EN 443:2008 type A, SOLAS and MED.

- 01 Half-shell firefighting helmet; EN 443:2008 type A
- 02 Aramid-reinforced Duroplast (SMC) shell
- 03 Chin-length visor with anti-scratch coating on both sides (EN 14458)
- 04 4-point retention harness and adjusting wheel usable with thick gloves
- 05 SOLAS and MED approved
