

Comfort Vest CVP 5220

Series: Comfort Vest

The Dräger Comfort Vest CVP 5220 is a cooling vest worn underneath fire brigade clothing or gas-tight chemical protective suits. Twenty PCM (phase change material) elements in the inner lining absorb excess heat at a skin temperature of 28 °C and reduce skin temperature by approx. 3–4 °C; depending on workload and ambient temperature the effect lasts up to 4 hours. It needs no pre-freezing or dipping into water and is ready again within 4 hours at most when stored below 22 °C.

- 01 No pre-freezing or dipping into water
- 02 Reduces skin temperature by approx. 3–4 °C
- 03 Cooling for up to 4 hours, depending on workload and ambient temperature
- 04 Ready again within 4 hours at most when stored below 22 °C
- 05 Hook-and-loop fasteners; washable after the PCM elements are removed
- 06 Four sizes: S/M, L/XL, XXL/XXXL, XXXXL/XXXXXL
