

Dräger FPS 7000

Series: Dräger FPS

The Dräger FPS 7000 series full face masks offer a high level of safety and wearing comfort. Thanks to the proven design and the different sizes, the mask fits comfortably and seals tightly; the combination of the mask fit with the visor geometry gives a wide field of vision. The distortion-free polycarbonate visor is available with different coatings and does not fog thanks to optimised air circulation. The ergonomic head harness, the double-sealing frame and the triple face seal provide a safe and comfortable fit for almost all face shapes; the harness allows the mask to be put on and taken off quickly. The mask body is available in skin-friendly EPDM or silicone. The S-fix and Q-fix adapters developed for the FPS 7000 prevent unintentional release in mask-helmet combinations, for example with the Dräger HPS 7000 helmet. With a choice of connections (Rd40 thread, M45 x 3 thread, ESA and Dräger plug-in connections) it can be combined with Rd40 filters, powered air-purifying filter units (PAPR), airline systems, self-contained breathing apparatus and closed-circuit breathing apparatus. The mask meets EN 136 class 3 and EN 137 type 2.

- 01 EN 136 class 3, EN 137 type 2
- 02 Distortion-free, anti-fog polycarbonate visor
- 03 Sizes S, M, L; EPDM or silicone body
- 04 Rd40, M45 x 3, ESA and Dräger plug-in connection options
- 05 S-fix / Q-fix mask-helmet combination with HPS 7000
- 06 Communication system option

Technical data

BRAND	Dräger
MODEL	Dräger FPS 7000
CONNECTION	EN 148-1 Rd40 standard thread

EN 136 CLASS	3
FACE PIECE MATERIAL	EPDM
SIZE	S · M · L
VISOR MATERIAL	PC (impact-resistant); PCas (impact-resistant, scratch-resistant, higher chemical resistance); APEC (impact-resistant, higher heat resistance)
COMPATIBLE WITH	RD40-filters · Motoraangedreven filterunits (PAPR) · Ademluchtleidingsysteem · Ademluchttoestel · Kringloopademluchttoestel
