Dräger X-plore 1700

Product code: 3951080 · Series: Dräger X-plore 1700

The Dräger X-plore 1700 is a series of flat-fold particle-filtering half masks for easy and comfortable breathing. The series gives effective protection against fine dust and solid and liquid particles found in industry, mining and tunnelling, specialist trades, agriculture and horticulture and services, and is available in all three protection classes FFP1, FFP2 and FFP3 according to EN 149:2001+A1:2009. Colour coding identifies the class quickly: dark blue for FFP1, light blue for FFP2 and white for FFP3. The CoolSAFE filter material combines low breathing resistance with high filter performance; the masks have passed the dolomite dust test, giving longer use in high-dust work (for example in construction). The optional CoolMAX exhalation valve removes moist, warm air. The VarioFLEX head harness is a continuous loop of elastic textile; on X-plore 1700+ versions the strap length is adjustable with EasyStop. An adjustable nose clip and integrated nose cushion support the seal; the soft, hypoallergenic and water-repellent fleece inside adds comfort. Odour versions have an extra layer of activated carbon. Each mask is packed flat and individually in a plastic bag. Single-shift use (NR); one size.

- 01 Protection classes FFP1, FFP2 and FFP3
- 02 Flat-fold, individually and hygienically packed
- 03 Dolomite tested (D), single shift (NR), one size
- 04 Optional CoolMAX valve and odour version
- 05 VarioFLEX head harness; EasyStop on 1700+ versions
- 06 EN 149:2001+A1:2009, AS/NZS 1716:2012
