

Dräger X-plore 8000 Filters

Product code: 6739550 · Series: Dräger X-plore 8000

Dräger X-plore 8000 filters are a filter range for Dräger X-plore 8000 powered air-purifying respirators (PAPR). The range offers different filter types for the main fields of use and protects against particles and various gases and vapours. The range includes five types: A1B1E1 P R SL (6739550), A1B1E1K1 Hg P R SL (6739555), A2 P R SL (6739545), A2 (6739580) and K2 (6739585). Filter choice depends on the substance; for example A1B1E1K1 Hg P R SL and K2 for ammonia, and A1B1E1 P R SL, A1B1E1K1 Hg P R SL, A2 and A2 P R SL for benzene. Mask and filter can protect against inhaling radioactive particles but not against radioactive emission or radiation; when in doubt a combined particle and gas filter is recommended.

- 01 Filter range for Dräger X-plore 8000 PAPR units
- 02 Five types: A1B1E1 P R SL, A1B1E1K1 Hg P R SL, A2 P R SL, A2, K2
- 03 Particle, gas and vapour protection (by type)
- 04 Combined filter option for mercury vapour (Hg)
